

Anurag Ranjan

Software Developer

trojan.anurag07@gmail.com | [LinkedIn](#) | [Portfolio](#) | 9166791183

Career Objective

To work as a Frontend Software Developer in an organization where I can utilize my existing skills, knowledge, and continuously learn new technologies to contribute towards building scalable, high-performance, and user-centric applications.

Profile Summary

Frontend Software Developer with 2+ years of experience building scalable web applications using Angular, ReactJS, TypeScript, and JavaScript. Proficient in RESTful API integration, WCAG, state management (NgRx/Redux/RxJS), performance optimization, and responsive UI development. Experienced with SaaS, CRM, EdTech, and AI-powered applications featuring real-time systems, WebSockets, and authentication.

Experience

Drabito Technologies

Aug 2025 - May 2026 Noida, India

Software Developer

Emminence Innovation

Aug 2024 - Aug 2025 Gurugram, India

Frontend Developer

Projects

WorkED | SaaS-Based EdTech & Workforce Platform

Aug 2025 - May 2026

[About-WorkED](#)

Environment: Angular, TypeScript, RxJS, NgRx, REST APIs

- Developed dynamic dashboards and integrated 50+ REST APIs with authentication, pagination, AG Grid, and real-time data visualization for improved reliability and performance.
- Built responsive UI using Angular Material, HTML, CSS, Bootstrap, and TypeScript for seamless cross-device experience.
- Improved dashboard load time by 40% and reduced redundant API calls by 35-50% using lazy loading, lifecycle hooks, and RxJS caching strategies.
- Implemented Redux / NgRx for scalable and maintainable frontend state management.

Zep 360 | All-in-One OS for Solar & EPC Businesses

Feb 2026 - May 2026

Environment: ReactJS, Redux, Tailwind CSS

- Developed scalable ReactJS modules and reusable components with dynamic UI workflows for enterprise solar and EPC business operations.
- Integrated REST APIs with optimized state handling and responsive UI architecture.
- Improved user experience by implementing responsive layouts and efficient frontend rendering.

Team Chat Application | Real-Time Communication Platform

Environment: Angular, TypeScript, WebSockets

- Developed a real-time team chat application using Angular and WebSockets.
- Implemented group chat with user invites, mentions, typing indicators, and real-time support for text, image, and file messaging.
- Optimized frontend performance and real-time event handling for better scalability.

AI Assistant - EA Portal

Environment: Angular, Redux, Streaming APIs

- Developed an AI-powered assistant interface integrated with APIs for enterprise workflows.
- Implemented typewriter streaming responses and interactive UI animations.
- Managed assistant state using Redux / NgRx for scalable frontend architecture.
- Worked on authentication, authorization, and role-based access control for secure portal access.

Skills

- Programming Languages:** TypeScript, JavaScript, C++, HTML, CSS
- Frameworks & Libraries:** Angular, ReactJS, RxJS, Redux, NgRx, Angular Material, Bootstrap
- Frontend Concepts:** Component Architecture, Lazy Loading, State Management, Responsive Design, API Integration
- Architecture & Concepts:** Micro Frontend Architecture, Real-Time Systems (WebSockets), OOP, Performance Optimization, DSA
- AI & Integrations:** AI Integration, Streaming APIs, Dynamic UI Updates
- Tools & Platforms:** Git, Postman, VS Code

Achievements & Recognitions

- Contributed to enterprise-level SaaS and CRM applications serving large-scale business workflows.
- Collaborated with cross-functional teams in Agile/Scrum environments to deliver production-ready features.
- Worked on AI-powered assistant interfaces with real-time response streaming and interactive frontend experiences.

Academics

Bachelor of Technology | Computer Science Engineering

2020 - 2024

Lovely Professional University

7.5 CGPA
