

Career Objective

To work as a Frontend Software Developer in an organization where I can utilize my existing skills, knowledge, and continuously learn new technologies to contribute towards building scalable, high-performance, and user-centric applications.

Profile Summary

Frontend Software Developer with 1.6+ years of experience building scalable and responsive web applications using Angular, ReactJS, TypeScript, JavaScript, and modern frontend technologies. Skilled in Restful API integration, state management using NgRx/Redux, RxJS, performance optimization, reusable component architecture, and responsive UI development. Hands-on experience in developing SaaS, CRM, EdTech, and AI-powered applications with real-time streaming responses, WebSockets, authentication systems, and enterprise-level dashboards.

Experience

Drabito Technologies	Software Developer	Aug2025 – Present Noida, India
Emminence Innovation	Frontend Developer	Feb2025-Aug2025 Gurugram,India

Projects

WorkED SaaS-Based EdTech & Workforce Platform	Aug 2024 – Present About-WorkED
---	--

- Environment: Angular, TypeScript, RxJS, NgRx, REST APIs
- Developed dynamic dashboards using Angular with reusable components, reactive forms, and real-time data visualization.
 - Integrated 50+ REST APIs with authentication, pagination, AG Grid, and error handling to improve data reliability and performance.
 - Built responsive UI using Angular Material, HTML, CSS, Bootstrap, and TypeScript for seamless cross-device experience.
 - Improved enterprise SaaS and CRM dashboard load time by 40% using lazy loading, optimized API calls, and efficient state management.
 - Reduced redundant API calls by 35–50% using Angular lifecycle hooks and RxJS caching strategies.
 - Implemented Redux / NgRx for scalable and maintainable frontend state management.

Zep 360 All-in-One OS for Solar & EPC Businesses	Feb 2026 – Present
--	--------------------

- Environment: ReactJS, Redux, Tailwind CSS
- Worked on scalable ReactJS modules for enterprise solar and EPC business operations.
 - Developed reusable frontend components and dynamic UI workflows for service and operational management.
 - Integrated REST APIs with optimized state handling and responsive UI architecture.
 - Improved user experience by implementing responsive layouts and efficient frontend rendering.
 - Collaborated with backend and product teams to deliver production-ready business features.

Team Chat Application | Real-Time Communication Platform

- Environment: Angular, TypeScript, WebSockets
- Developed a real-time team chat application using Angular and WebSockets.
 - Implemented group chat, user invites, mentions, typing indicators, and online user status.
 - Added support for text, image, and file messaging with real-time updates.
 - Optimized frontend performance and real-time event handling for better scalability.

AI Assistant – EA Portal

- Environment: Angular, Redux, Streaming APIs
- Developed an AI-powered assistant interface integrated with APIs for enterprise workflows.
 - Implemented typewriter streaming responses and interactive UI animations.
 - Managed assistant state using Redux / NgRx for scalable frontend architecture.
 - Built mic animation and dynamic assistant interaction features.
 - Worked on authentication, authorization, and role-based access control for secure portal access.

Skills

- Programming Languages: TypeScript, JavaScript, C++, HTML, CSS
- Frameworks & Libraries: Angular, ReactJS, RxJS, Redux, NgRx, Angular Material, Bootstrap
- Frontend Concepts: Component Architecture, Lazy Loading, State Management, Responsive Design, API Integration
- Architecture & Concepts: Micro Frontend Architecture, Real-Time Systems (WebSockets), OOP, Performance Optimization
- AI & Integrations: AI Integration, Streaming APIs, Dynamic UI Updates
- Tools & Platforms: Git, Postman, VS Code
- Other Skills: WCAG, DSA, Authentication & Authorization

Achievements & Recognitions

- Contributed to enterprise-level SaaS and CRM applications serving large-scale business workflows.
- Collaborated with cross-functional teams in Agile/Scrum environments to deliver production-ready features.
- Worked on AI-powered assistant interfaces with real-time response streaming and interactive frontend experiences.
- Developed scalable and reusable frontend modules to improve maintainability and faster feature delivery.

Academics

Bachelor of Technology Computer Science Engineering	2020 - 2024
Lovely Professional University	7.5 CGPA
